Letter No A 6 C 999/34-35 d/19-11-34
from the Dy Commr, Chitaldrug St,
forwarding an estimate for a sum
of Rs 199000 prepared by the Sanitary
Engineer for the above work for the first stage
& sent to the President Davanagere Municipality,
with a copy of the resolution of the Davanagere
Municipal Council who have resolved to
pay the cost of pumps, engines etc Rs 49000
in cash immediately (2) the pipe lines cost,
Rs 120000 will have to be purchased from
Shivaravathi on credit, the entire cost being
paid in ten annual instalments of
Rs 12000/- each & that the Govt be requested
to waive the entire cost of Rs 30000/- establish-
ment, Tools & plant charges & request cash
order on the above ~~two points~~

1 Subd

2 The Davanagere Municipality wants
in this connection the following concession
apart from the ^{immediate} cash payment of Rs 49000
they make towards the cost of purchase
of pumps, engines etc in connection with the
^{above scheme}
(1) Issue of pipes to the extent of Rs 120000
on credit from Shivaravathi, the entire
cost being paid in ten annual instal-
ments of Rs 12000/- each In this connection
the Devt Branch may ^{if approved} first be consulted

and also how the
rel can pay the
instalment of Rs 12,000
per year to the Govt
works on account of
the cost, the pipes

reducing the closing balance the DyC
will if apptd be addressed in the matter

8 Regarding the supply of pipes from
Bhadrahat on credit - the cost being repaid in
ten annual instalments, the DyC for maybe considered

9 The cost of water plant charges come to more than
Rs 30,000. The first step is against the waiving of
these charges and the question of reducing the rate of
the charges from 18% to 7½% is under consideration.
If the latter rate is adopted the charges will be Rs 126.
In G.O. No 11822-5 of 23.5.14 sanctioning the original
scheme of water works in the town not only were the cost of water
plant charges waived but also a grant of Rs 30,000
was given for the work. The request of the DyC for
waiving the said charges now seems to deserve favorable
consideration especially as no grant is asked for
to forward

19 for remarks

Financial
Secretary
with counter

Mr
71 25-
Am
7/1

- Mr MK

20 The population of Davanagere town is 23 155. The original scheme of water supply involved an expenditure of Rs 2 lakhs. The present scheme is to duplicate the main at a cost of Rs 1 99 000/- A further expenditure of about Rs 61 000 is stated to be required when the second stage of the improvement scheme is taken up. I think the scheme is very costly for this town and the possibility of a cheaper scheme has to be considered.

21 The present proposals are -

(1) that the establishment and tools and plant charges amounting to Rs 30 000/- included in the estimate should be waived by Government

(2) that the cost of pipes amounting to Rs 1 20,000 has to be supplied by the Mysore Iron Works on credit

NOTE—Contn Sheet

7

File No

of 193

General and Revenue
Secretariat

the same being paid in ten annual instalments of Rs 12 000/-

and (3) that the balance of Rs 49 000 will be paid in cash from the closing balance at the credit of the Municipality (including investments)

As I have pointed out on several occasions the proposal to waive the recovery of the prescribed establishment and Tools and Plant charges or to reduce the amount payable on the above account involves increase of expenditure under "24 Civil Works" and is not financially acceptable. Our financial position is not as sound as it was in 1914 when the original scheme of water supply to Davanagere was sanctioned and the concession which was allowed then cannot be allowed in the case of subsequent improvements particularly in the present financial condition. Any concession to a Local Body should be in the shape of Government Grant in accordance with the prescribed rules.

The present working capital of the Iron Works is stated to be not adequate and the Iron Works have been asking for extra working capital. As stated by the Development Secretary it is not desirable to permit credit sales. The required funds have therefore to be obtained by the Municipality from Government as a loan repayable in ten annual instalments with interest at at least 5½ per annum.

It is stated that the balance of Rs 49 000/- will be paid out of the invested balance of Rs 50 793/- From the cash account of the Municipality for the month of November 1934 it is seen that the cash and investment balances of

2-11-35 Rs 50,799 a unit
from Dec. 1934

Serial
No

of the Municipality at the end of November 1934 work up to Rs 30 274 and Rs 43 210 respectively against these the liabilities on account of deposits and public improvement fund work up to Rs 24051/- The net amount available out of the invested balance for other items of expenditure is therefore Rs 19 159/- If the balance required to make up Rs 49 000/- is drawn from the cash balance the cash balance will be practically nil whereas the minimum cash balance to be retained is about Rs 30 000/- (25% of the receipts) vide Rule 20 Municipal Manual If the water supply scheme is to be sanctioned loan to the extent of about Rs 1 80 000 has to be sanctioned to the Municipality and the Municipality has to pay every year (towards both principal and interest) Rs 23880. Even if Rs 49 000/- can be paid out of the current cash and investment balances a loan of Rs 1½ lakhs will be required and the annual payment towards principal and interest will amount to Rs 19 900/- The Municipality states that a sum of Rs 12 000/- will be earmarked for the annual payments out of the revenues from toll. From the Budget estimate for 1934-35 it is seen that there is not much margin between normal revenue and normal expenditure taking into account the toll and other items of revenue and it is therefore not clear how the Municipality can find the extra sum of about Rs 3 880 (or at least Rs 19,900) from the total

Revenue of each year after meeting all other items of expenditure

✓ No mention has been made in the estimate as to the extra maintenance charges to be incurred year after year. If any additional expenditure has to be incurred the source for meeting it has to be pointed out.

✓ Taking all these factors into account I think the Municipality is not in a position to finance a costly scheme of the kind now proposed and if a less costly scheme is not possible the scheme itself should wait till the finances of the Municipality improve.

✓ It is financially not correct to make the Municipality spend a larger sum than it can afford for improving the water supply with the idea of finding a sale for Bhadravathi pipes.

Handwritten signature
28/11/35
28/11/35

✓ I have since discussed this question with the Sanitary Engineer Mr. Gaudacher who has elucidated the following information:

A The scheme included the supply of water also. The Householder pays for the water.

B There will be no extra maintenance. In fact savings are anticipated by the working of the scheme and by the use of the water.

C The Householder is not paying a large amount. The water charges are cheaper and

no matter

find out a white. cheap. etc

45 The President's letter of 3.3.35 explains the financial condition of the Mety and ^{mety} ~~comitates~~ alternative proposals for financing the water supply improvement scheme

46 The President says that you propose to pay Rs 49,000 towards the scheme without affecting the minimum working balance prescribed and repeats the request for being allowed to pay the cost of pipes in 10 annual instalments of Rs 12,000. He also ^{requests that} ~~states that~~ the cost of tools of plant charges ^{shall} ~~be~~ calculated only on the working expenses & not on the cost of materials also and that the charges as thus calculated amounting to Rs 6860 may either be waived or given as a grant from Govt funds

47 The alternative proposal is to give a loan of Rs 2,50,000 to the Mety at 4.5% interest for executing this as well as the other development works which cannot be long delayed. Details of these works & the amounts required in respect of each have not been furnished

48 As regards payment of the annual instalments towards the loan, the President has not given any details as to how the amount can be met after providing for the ordinary expenditure. All that he says is that the proposal now made will enable the Council to curtail expenditure under Public Works & Water Supply and earmark the savings in addition to a portion

55] Regarding the change in the procedure of calculating the Establishment and Tools and Plant charges on the works outlay reference is invited to my note in the file relating the the Chitaldrug Water Supply. As stated therein the usual procedure has to be followed until the revised procedure is examined in detail and sanctioned.

56] As I have pointed out more than once the minimum rate of interest to be charged on loans to Local Bodies is 5½% and this is the rate generally charged for all loans to Local Bodies and its reduction to less than 5½% is not financially acceptable.

57] In my previous note I have pointed out how the Municipality will not be able to finance the Water Supply Scheme or to repay the loan with interest from its normal income. It is stated that the income of the Municipality during the current year is likely to be about Rs 31,000 more than the Budget anticipation. It is very doubtful whether this improvement will actually be realised. Even if it is realised during the current year on account of the collection of the arrears, there will not be much improvement in the income from the next year since the collections can never exceed the demand. Even taking that the entire demand of the year will be collected without leaving any arrears there will not be much improvement in income every year when compared to the revenue taken in the current year's budget. I am therefore still of opinion that the Municipality is not in a

(17)

Dahanagere Water Supply

File No

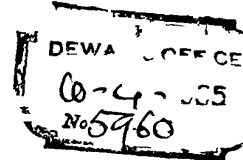

288

of 193

General and Revenue
Secretariat

position to meet the liabilities on account of the loan at present

If however Government think that the Municipality will be able to repay the loan -- with interest at 5% within 15 years after meeting other items of expenditure, loan of the amount actually required for the water supply scheme may be sanctioned. It is not desirable to advance any money for other development works in the present financial condition of the Municipality

3/4/35

3/4/35

51 The question of allotment charges may be referred for separate consideration and the decision will arise from there.

As regards interest vide Member's note dated 27th March. This may be fixed at 5%

The amount of the loan may be confined to the requirements of the water supply estimate viz Rs 2 lacs
Secy Secy

9/4/35

61 The amount actually Rs 1.5 lacs
begd for the water supply may be sanctioned as loan repayable at 5% p.c. in 15 instalments
Office will note this amount

Final Note by the Second Member of Council

Subject —

Grant of a loan of Rs 1,50,000 to the Davangere Municipality for improvement of Water Supply

P

Q

The Deputy Commissioner, Chitaldrug has recommended^x for sanction of Government an estimate of the Davangere Municipal Council for Rs 1,99,000 for the improvement of Water Supply to Davangere town. He has also recommended the grant of a loan of Rs 2,50,000 to the Municipality at 4 per cent interest for the improvement of Water Supply and other development works.

The request of the Municipality was examined in detail, and the scheme was also discussed by me with the Deputy Commissioner and the Municipal Council, when I visited^x Davangere last month. I found that improvements to the Water Supply Scheme were urgently needed and that it was necessary to sanction the scheme estimated to cost Rs 1,99,000 and to grant a loan from Government to the Municipal Council for meeting the cost of the work. The resources of the Municipality do not permit their undertaking any other development works for the present.

S

As regards the question of financing the scheme, the Municipal Council have^x agreed to pay a sum of Rs 49,000 towards the cost of the Water Supply Scheme, out of their investments, and for meeting the balance, it is proposed^x to sanction from Government a loan of Rs 1½ lakhs repayable in fifteen equal annual instalments, carrying interest at 5 per cent per annum.

OFFICE OF THE DEPUTY COMMISSIONER
CHITALDRUG DISTRICT

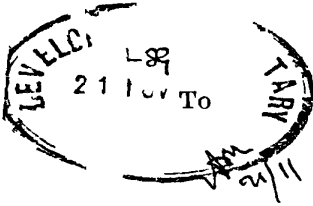

Dated Chitaldrug 19th November 1934

GEN 2246
21 NOV 1934

FROM

N SUNDARARAJA IYFNGAR Esq BA

Deputy Commissioner, BANGALORE
Chitaldrug District

M Venkatanaranappa Esq BA,
Development Secretary To Government,
BANGALORE

Sir,

I have the honor to state that with a view to improve the present water supply to Davangere town a scheme was prepared by the Sanitary Engineer, Bureau of Sanitary Engineering, Bangalore for a sum of Rs 2,60,000 to be taken up in 2 stages. The detailed estimate for the first stage of the scheme was prepared for a sum of Rs 1,99,000 and sent to the President, Davangere municipality for being placed before the municipal council for their consideration. The scheme came up before the council at their meeting held on 2nd November 1934 when the question was discussed at length. A copy of the resolution of the council is enclosed herewith for reference. The estimate on hand consists of three parts as noted in the margin. The work will be entrusted to the

1 Cost of pipes	Rs 120000	Executive Engineer, Bureau of Sanitary
2 Cost of pumps, Engines &c	49000	Engineering for being worked out
3 Establishment, Tools and plant charges	30000	The municipal council have resolved
Total	199000	to pay up the cost of <u>pumps</u> , Eng:

etc, (Rs 49000) in cash immediately so that the work might be taken up at once. The pipe lines will have to be purchased from Bhadravati on credit, the entire cost being paid in ten annual instalments of Rs 12000/- each. As regards the third item viz establishment, tools and plant charges (Rs 30,000/-) the Municipal Council has resolved that the Government be requested to waive the entire cost.

In submitting the estimates for the sanction of Government I request that the Government might be pleased to order the supply of the pipe lines required from Bhadravati Iron works on credit as requested by the Municipal Council the cost being repaid in ten annual

equal instalments of Rs 12,000/- each

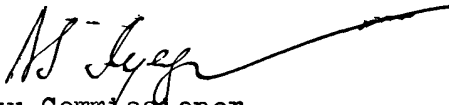

As regards the request of the Council for waiving the establishment, tools and plant charges of Rs 30,000/- I think that the request of the Council is reasonable. In this connection I would invite reference to Government Order No 11822-5/41 287-13-3 dated 23rd May 1914 sanctioning the Davangere Water Works Scheme for a sum of Rs 2,08,832/- wherein the levy of establishment, tools and plant charges was ordered to be waived. It seems necessary that a similar concession is extended this time also in view of the facts that the Municipal Council has to spend large amounts on this scheme.

I request that early orders of Government may kindly be obtained to the estimate submitted herewith, to the ⁽¹⁾waiving of the establishment, tools and plant charges and to the purchase of pipes on credit.

I have the honor to be,

Sir,

Your most obedient servant,

Deputy Commissioner,

Chitaldrug District

Sir,

With reference to your letter No L 3801-2 dated 30-11-1934 enquiring how the Municipal Council, Davangere would pay a sum of Rs 49,000/- immediately towards the water supply scheme and how they can pay the yearly instalment of Rs 12,000/- ~~etc~~ to the Iron works etc I have the honor to forward herewith a copy of letter No E T 135/34-35 dated 21-12-1934 received from the President in the matter along with a copy of the resolution of the Council in this respect I request that early sanction of Government may kindly be obtained to the Scheme

I have the honor to be,

Sir,

Your most obedient servant,

B. Jegan
Deputy Commissioner,

Chitaldrug District

Letter No E T 135/34-35 dated 21st December 1934 from the President,
Davangere Municipality to the Deputy Commissioner Chitaldrug District

With reference to your memo No A6 C 999/34-35 dated 11th November
1934 forwarding a copy of letter No L 3801-2 dated 30th November 1934
from the Development Secretary calling for details as to how the Municipal
Council will pay immediately a sum of Rs 49,000/- for starting the
Davangere Water works and as to the source from which the annual payment
of Rs 12,000/- will be met, I have the honor to state that the Municipality
has an invested balance of Rs 50,799/- as noted in the margin in addition

Investments

1	In Mysore Govt S B current (account No 958) Deposit - Rs 30,299/-
2	In Mysore Government Fixed Deposit (Account No 9/442) - Rs 10,500/-
3	In 5% Mysore Govt Loan Bonds of 1938 (0 362) Rs 10,000/-

Total	<u>Rs 50,799/-</u>

to Rs 3000/- which is over
and above the prescribed
minimum balance as per
Budget for 34-35 sanctioned
by Government The
Council will be prepared to

pay out of the above investments a sum of Rs 49,000/- immediately

The Municipal Council in their meeting dated 19-12-1934 resolved that
a sum of Rs 12,000/- be earmarked for the annual payments out of the
revenues from toll The average income from this source is more than
Rs 32,000/- for the past five years A copy of the resolution is also
enclosed herewith for kind reference I request you therefore to kindly
recommend to Government to accord early sanction to the proposal of the
Municipal Council in the matter

The Deputy Commissioner
Chitaldrug District
ML 188-34-4

Sir

With reference to the correspondence ending with your letter No A 6 C 999/34-35 dated 22nd Decemoer 1934 re the scheme for the improvement of the Davangere Water Supply, at a cost of 1 99 000 I am directed to state that the proposal to purchase the pipes on credit from the Bhadravathi Iron Works cannot be approved and that the required funds Viz Rs 1 20 000/- will have to be obtained by the Municipality from Government as a loan

2 It is stated that the balance of Rs 49 000, exclusive of the sum of - - - - Rs 30 000 on account of the Establishment Tools and plant charges which are asked to be waived, will be paid out of the invested balance of Rs 50 799 at the credit of the Municipality From the cash account of the Municipality for the month of December 1934 it is seen that the cash and investment balances at the end of that month stood at Rs 22,401 and Rs 50,799 respectively and that against these the liabilities on account of deposits and public improvement Fund amounted to Rs 20491 The net amount available out of the invested balance for other items of expenditure is therefore Rs 30308 If the balance required to make up Rs 49 000 is drawn from the

cash balance the ~~cash balance~~^{balance} will be ~~practically nil~~^{about Rs 3,789} whereas the minimum cash balance to be retained is about Rs 30 000. Further, the proposal of the Municipality to waive the establishment and Tools and Plant charges as in the case of the original scheme cannot be sanctioned and these charges will have also to be paid.

3 If the scheme is to be sanctioned the Municipality will have to take a loan of about Rs ~~1½~~^{11½} lakhs from Government, repayable in ten years at 5 per cent interest and the annual instalment payable on account of principal and interest towards the loan will be Rs ~~23,700~~^{about 23,700}. It is stated that a sum of Rs 12 000 will be earmarked for the annual payments out of the revenues from toll. Even if this could be done, the Municipality will have to find a further sum of about ~~Rs 10 000~~^{Rs 11,217} to make up the required amount. From the Budget estimates for the year 1934-35 it is ~~seen~~^{known} that there is not much margin between normal revenue and normal expenditure, taking into account the toll and other items of revenue, and it is therefore not clear how the Municipality can find the sum due on account of the loan from the total revenue of each year after meeting all other items of expenditure.

4 I am to enquire whether the Municipality is prepared to take a loan of Rs 1½ lakhs from Government on the terms referred to above and if so, how the annual instalment of loan and interest will be

arranged to be paid It may be clearly explained how after meeting the ordinary items of expenditure it will be possible to find funds for the said instalment

5 A very early reply is requested

I have &c

GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE

General and Revenue Secretariat

Dated Bangalore 23rd February 1935

No 25885-
22188-34-4

From

The Secretary to the Government of His Highness the Maharaja of Mysore
Development Department

To

The Deputy Commissioner,
Chitaldrug District

Sir

With reference to the correspondence ending with your letter No A 6 C 999/34-35 dated 22nd December 1934 regarding the scheme for the improvement of the Davangere Water Supply at a cost of 1,99,000, I am directed to state that the proposal to purchase the pipes on credit from the Bhadravati Iron Works cannot be approved and that the required funds viz , Rs 1,20,000/- will have to be obtained by the Municipality from Government as a loan

2 It is stated that the balance of Rs 49,000/-, exclusive of the sum of Rs 30,000/- on account of the Establishment, Tools and plant charges which are asked to be waived, will be paid out of the invested balance of Rs 50,799/- at the credit of the Municipality. From the cash account of the Municipality for the month of December 1934, it is seen that the cash and investment balances at the end of that month stood at Rs 22,401/- and Rs 50,799/- respectively and that against these the liabilities on account of deposits and public improvement Fund amounted to Rs 20,491/- The net amount available out of the invested balance for other items of expenditure is therefore Rs 30,308/- If the balance required to make up Rs 49,000/- is drawn from the cash balance, the latter will be reduced to Rs 3,709/-, whereas the minimum cash balance to be retained is about Rs 30,000/- Further, the proposal of the Municipality to waive the establishment and tools and plant charges as in the case of the original scheme cannot be sanctioned and these charges will have also to be paid

3 If the scheme is to be sanctioned the Municipality will have to take a loan of about Rs 1½ to 1¾ lakhs from Government,

repayable in ten years at 5½ per cent interest, and the annual instalment payable on account of principal and interest towards the loan will be about Rs 23,000/- It is stated that a sum of Rs 12,000/- will be earmarked for the annual payments out of the revenues from toll Even if this could be done, the Municipality will have to find a further sum of about Rs 11,000 to make up the required amount From the Budget Estimates for the year 1934-35 it is however seen that there is not much margin between normal revenue and normal expenditure, taking into account the toll and other items of revenue, and it is therefore not clear how the Municipality can find the sum due on account of the loan from the total revenue of each year after meeting all other items of expenditure

4 I am to enquire whether the Municipality is prepared to take a loan of Rs 1½ lakhs from Government on the terms referred to above and if so, how the annual instalment of loan and interest will be arranged to be paid It may be clearly explained how after meeting the ordinary items of expenditure it will be possible to find funds for the said instalment

Subject - Water Supply Scheme - Davangere

Sir,

With reference to your letter No L 5885/L 188-34-4 dated 23rd February 1935, and in continuation of this office No A6 C 999/34-35 dated 22nd December 1934, I have the honor to state that I have discussed this matter informally with the President and the members of the Municipal Council, Davangere, on the 27th February 1935 when I was there. The present report of the President (vide copy enclosed) has been drawn up as a result of the decisions taken at that informal meeting. Davangere is a growing town and the need for water is paramount there. What is stated in para 4 of the President's letter is quite true. Unless the water supply problem is satisfactorily solved, the future of Davangere will be gloomy indeed. I have inspected the southern extension also and the need for water is greatly felt in that part of the town.

2 In view of the improvement of water supply and other commitments of the municipality, if it is not possible to supply the pipes on credit from Bhadravati the only alternative left is for this local body to take a loan from Government. Government may be pleased to grant a loan of Rs 2,50,000 as prayed for, at the reduced rate of 4% in view of the facts stated in para 6 of the President's report.

3 As regards the Tools and Plant charges, the request of the Council to levy it only on the working expenses as detailed in the

resolution of the municipal council deserves very favorable consideration at the hands of Government. In view of the fact that in the case of the original scheme Government were pleased to waive the tools and plant charges entirely, the present request of the municipality to waive this amount of Rs 6,860 or to ~~xxxxxx~~ treat it as an outright grant from Government deserves favorable consideration.

4 The financial position of the municipality seems to be sound as stated by the President in his communication under forwardal. A statement showing the financial position as it stood on 1st March 1935, is also enclosed together with a copy of the resolution of the council in this matter.

5 A cutting from the Hindu dated 13th February 1935 detailing the concession extended to the Bangalore City Municipality in respect of its underground drainage scheme is also enclosed as forwarded by the President.

6 To sum up, the points for orders are the following -
(1) Supply of pipes on credit from Bhadravati

OR

A loan of Rs 2,50,000 to the Municipality at a favorable rate of interest viz, 4%

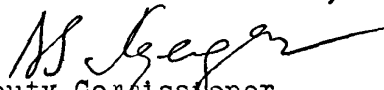

- (ii) Calculation of the Tools and Plant charges on the working expenses only as was done in the case of the Bangalore City Municipality
- (iii) Waiving of this amount as was done in the case of the original scheme

OR

|| in the alternative treating this amount of Rs 6 860 as an outright grant from Government

I beg to request that Government may be pleased to view these requests of the municipality with sympathy and pass suitable orders thereon early.

I have the honor to be,
S I R,
Your most obedient servant,

Deputy Commissioner,
Chitaldrug District

Letter No E T 194 dated 3rd March 1935 from the President, Town Municipal Council, Davangere, to the Deputy Commissioner, Chitaldrug

With reference to your letter No AG C 999/34-35 dated 23-2-1935 enclosing copy of letter No L 5885/11 188-34-4 dated 23-2-1935 from the Development Secretary to Government calling for the views of the Municipal Council re funds to be provided for the Water Supply improvement scheme to Davangere and Harihar towns, I have the honor to state that the matter was carefully considered at a special meeting of the municipal council and their views are embodied in the copy of their resolutions dated 2-3-1935 herewith submitted for kind perusal. Municipal council represent their case as follows -

2 Before submitting the scheme for orders of Government the council carried on correspondence with the Sales-manager, Biadravati, and with the Sanitary Engineer, Bureau of Sanitary Engineering. The council were informed that there was a large stock of pipes of different dimensions which owing to their external rough surface, were lying unsold and that the Sales Manager was willing to sell them to the municipality at a concession rate. The council were also advised that though 78% of pipes in stock were of a larger diameter than what was required by the municipality the council would gain by putting 8" pipes first from the pumping sides 9" and 10" pipes towards the Davangere end. It was considered that the sale of these to the municipality would be advantageous both to the Iron Works and to the municipality. Government were accordingly approached to permit the sale of these dead stock on credit receiving the amount in 10 annual instalments.

3 The municipal council in order to avail of this suitable opportunity postponed all other development works and pooled all their available resources and worked out a scheme for financing the water supply and submitted their proposal with the sincere expectation that their modest request would be immediately sanctioned. In these circumstances, I am to request the Government may be generously pleased to review the position and reconsider the possibility of supplying the said pipes on credit recovering the amount in 10 equal annual instalments of Rs 12000.

4 During your inspection of the town on 27-2-1935 you have noticed that the southern extension is rapidly developing and new houses are springing up. Nearly 50 Bungalow sites, 86 cottage sites ~~xxx~~ 120 house sites and 141 small sites for poor and middle classes have been sold and many people have built or anxious to build investing thousands of rupees.

on houses Unless good water supply is given, large amounts spent by the Municipal Council for acquisition and layout of the extensions with a view to remove congestion in the old town and to improve the health of the town will go to waste

5 The Municipal council have just completed the first two stages of the drainage scheme and are executing the third stage at a total cost of Rs 84,000 Large sums were also spent in recent years for tarring sore roads and improving others and in providing other amenities in the town

6 If the request of the municipal council to allow sale of pipes on credit from Bhadravati be not viewed with favor, the municipal council is obliged to take a loan The council have recently levied additional taxes, (1) Octroi and (2) Sanitary Cess Increases are proposed for the license fees and water rates They have thus reached their maximum capacity of taxation in these days of depression The assessed taxes work out to Rs 3-4-0 per head of population Hence the expenditure for repayment of loan with interest will have to be met with from the existing resources alone Having regard to the fact that the other development works cannot also be long delayed the council resolve to take a loan of Rs 2,50,000 and request Government to reduce the rate of interest to 4% in view of the heavy commitments of the municipality It is earnestly hoped that having regard to the large amount of loan now asked the rate of interest may be reduced as requested above This proposal will enable the council to curtail their expenditure under D2 Public Works and E9 Water Supply and earmark the same in addition to a portion of toll-revenue as already reported for repayment of loan

Regarding "Tools and Plant charges" the council request that the Government be pleased to extend the principle of levying tools and plant charges only on working expenses as detailed in the resolution of the Municipal Council Regarding financial position of the municipality referred to in para 2 of the letter under avertence, I beg to state that it will be seen from the forecast of income and expenditure based on 8 months' actuals, the council will have a closing balance of Rs 25,903 at the end of June 1935 as follows -

Cash balance on 1-3-1935 as per Municipal accounts	Rs 21,564- 0- 0
Collection during the next 4 months	67,218- 0- 0
Total -	88,782- 0- 0
Expenditure during the next 4 months as per statement attached	43,306- 0- 0
Closing balance	45,476- 0- 0
Add investments	50,799- 0- 0
Total -	96,275- 0- 0
Deduct deposits	8,384- 0- 0
Deduct Public Improvement Funds	11,988- 0- 0
To be paid to water works	49,000- 0- 0

Closing balance on 1-7-1935	25,903- 0- 0
-----------------------------	--------------

With the improvement in the financial position over the Budget figures during the current year, the council are able to pay Rs 49,000 without trenching in any way on the minimum balance

8 While reviewing the financial position from the monthly account for December 1934, the probable income and expenditure for the half year ending 30-6-1935 do not appear to have been taken into account

To sum up the council state -

- (1) that their financial position is sound
- (2) that the sale of pipes from Bhadravati Iron Works may be allowed on credit receiving the amount in 10 annual equal instalments of Rs 12,000

03

request the grant of a loan of Rs 2,50,000 at 4% interest

- (3) request waiver of Rs. 6,860 being the tools and Plant charges applying the provisions laid down in G.O. referred to above

03

to treat the amount of Rs. 6,860 as an outright grant from Government.

I request you to be so good as to recommend to Government to sanction the proposals of the municipal council.

[illegible]

Subject No 1

RESOLUTION

Letter No A6 C 999/34-35
dated 25-2-35 from the
Deputy Commissioner,
Chitaldrug District for-
warding letter No L 5865/
Ml 182-34-4 dated 23-2-35
from the Development
Secretar to Government

The council are informed that there is a large stock of pipes of various dimension at Bhadravati and that their appearance is not very good though they are certified to be perfectly sound and that to dispose of this stock and to reduce the capital cost of the scheme, the Iron Works are prepared to sell them at concession rates. The sale of these pipes to this municipality would thus be to the mutual advantage both to the Bhadravati iron work and the municipality alike. The municipal council postponed all other development works and worked out a scheme of improving the present water supply and submitted their proposals. It is therefore requested that the Govt be pleased to review the position and reconsider the possibility of supplying the said pipes on credit receiving the amount in 10 equal annual instalments of Rs 12,000. If this request is not viewed with favor, the municipal council is obliged to take a loan.

The council have recently levied additional taxes under (1) Octroi and (2) Sanitary Cess. Increases are proposed for the license fees and water rates. They have thus reached their maximum capacity of taxation in these days of depression. The assessed taxes work out to be 3-4-0 per head of population. Hence the expenditure for repayment of loan with interest will have to be met from the existing resources alone. Having regard to the fact that the other development works cannot also be long delayed the council resolve to take a loan of Rs 2,50,000 and request Government to reduce the rate of interest to 4% in view of the heavy commitments of the municipality. It is earnestly hoped that having regard to the large amount of loan now asked, the rate of interest will be reduced as requested above.

That as regards the tools and plant charges the Government may be requested to (1) to extend this municipality the principle laid down in Government order in regard to the underground drainage scheme in Bangalore City (vide cutting from the Hindu dated 13-2-1935) of levying tools and plant charges on only working expenses excluding cost of machinery and plants. Having this principle in view the value of work to be executed by the Department of Bureau of Sanitary Engineering will be Rs 38,000, the balance of the expenditure being the cost of machinery, pipe line etc. The tools and plant charges on Rs 38,000 will be Rs 6,860. The council earnestly request that for reasons explained in this office letter No ET 113/34-35 dated 8th November 1934, Government will be pleased to waive this small amount of Rs 6,860 or sanction it as a Government grant.

That as strenuous efforts to collect all outstanding dues are being made the council considers that the forecast of actuals now prepared may be accepted as after providing payments of Rs 49,000 the financial position is expected to be sound at the close of the year.

Resolved that a reply may be sent on the above lines

(Sd) I C Subba Rao,
President,
Davangere Municipality

**Grand Total**

Report to accompany the estimate for duplicating the rising main from Harihar to Davangere and for installing a new unit in connection with improving the water supply to Davangere Town

\*\*\*\*\*

AMOUNT OF ESTIMATE Rs 1,99,000/-

The present rising main is of 8" steel pipes and it is 49500' in length. A number of these pipes have holes in them thereby causing <sup>leakage &</sup> frequent shut down. It is now proposed to duplicate the main. Another 8' cast iron main is now proposed to be used. The accepted rate for this is Rs 6-4-0 a Cwt. F O R Bhadravathi, the Iron Works have offered to give the 9" and 10" pipes in stock at Rs 92/- a ton and though the 10" pipes are heavier than 8" the cost per Rft will be the same as that of 8" pipes owing to the reduction in rate and in the case of 9" pipes, there will be savings of 20% in cost. Added to this, the friction head in the 9" and 10" pipes is naturally less than in 8' pipes and this results in saving in running expenses. Hence, it is proposed to accept the offer of the Iron Works ~~to sell the pipes in stock~~ and purchase 1000 pipes of 8", 2450 of 9" and the balance of 10" to make up the estimated length of 9½ miles. The cost works up to Rs 1 20 lakhs as provided in the estimate.

According to the resolution of the Municipal Council dated 30-6-1934, the lay out of the machinery has to be such as to adapt them for electric drive. Hence it is considered best to leave the present building to house the motors and other electric machinery and to install the Diesel Engine set in an extension towards the Harihar Station. This new unit will be capable of discharging 400000 to 500000 gallons per day to Davangere through both the mains and it will be required as a

as a standby even after electrification

Lumpsum provisions are made for the fittings and other items of work. The Municipality has been requested to deposit a sum of Rs 100/- to conduct the necessary surveys and immediately after the amount is received, actual levels will be taken and details worked out.

According to the standing orders, Establishment Tools and Plant charges at 18% are included in the estimate.

END

Subject

- 1 Letter No 1060 dated 3-11-34 from the Sanitary Engineer, Bureau of Sanitary Engineering, forwarding estimate for - Rs 1,99,000/- for the first - stage of improving the Water Supply to Davangere Town for Countersignature and requesting to intimate the ways and means for financing the same

Resolution

The correspondence on the subject ending with letter No 1060 dated 3-11-34 from the Sanitary Engineer, Bureau of Sanitary Engineering was read along with the preliminary estimate for Rs 1,99,000/- and the report accompanying the same Resolved that the estimate for - Rs 1,99,000/- be countersigned by the President

As already resolved by the Municipal Council on 11-10-1934, the Government may be requested to kindly waive item No 9 for Rs 30,000/- being the establishment, tools and plant charges at 18% provided in the estimate

The amount of the estimate excluding these charges will be met by the Municipal Council as follows -

- (1) A sum of Rs 49,000/- will be paid in cash by the Municipal Council at once
- (2) The cost of pipes viz Rs 1,20,000/- will be paid to Bhadravathi Iron Works in ten annual instalments of Rs 12,000/- for which sanction of Government may kindly be obtained

Subject No 1

Resolution

To consider the several improve-  
ments of the Town

The Deputy Commissioner, Chitaldrug,  
the Sanitary Engineer, Bureau of  
Sanitary Engineering and the Executive  
Engineer, Chitaldrug Division were  
kindly present on invitation

The Deputy Commissioner and the Sanitary  
Engineer explained the disadvantages of  
having a short distance pipe line of  
10" or 12" from financial administrative  
points view and advised duplicating the  
mains by laying another cast iron pipe  
line by the side of the existing steel  
pipe line

- 1 It is resolved that an 8" cast iron  
pipe line be laid by the side of the  
existing pipe line
- 2 That with a view to expedite the  
improvements to the present water supply  
estimates for the water supply be -  
separately prepared in the first -  
instance for laying the pipe line and  
purchasing and fitting up a Diesel Oil  
Engine and centrifugal pump This may  
be submitted and early sanction obtained  
independently the question of raising a  
loan
- 3 That the Government be requested to  
arrange for the supply of cast iron  
pipes from the Bhadravathi Iron Works  
the cost being allowed to be paid in  
ten annual instalments
- 4 That the Government be requested to  
get the work done by the Department of  
Bureau of Sanitary Engineering and to  
waive the tools and plants and super-  
vision charges

The Council record a vote of thanks  
to the Deputy Commissioner, Sanitary  
Engineer and the Executive Engineer  
for the kind interest and trouble taken  
and the advice given by them in this  
behalf
